“Gluteus Minimus and Gluteus Medius Muscle Activity During Common Rehabilitation Exercises in Postmenopausal Women”

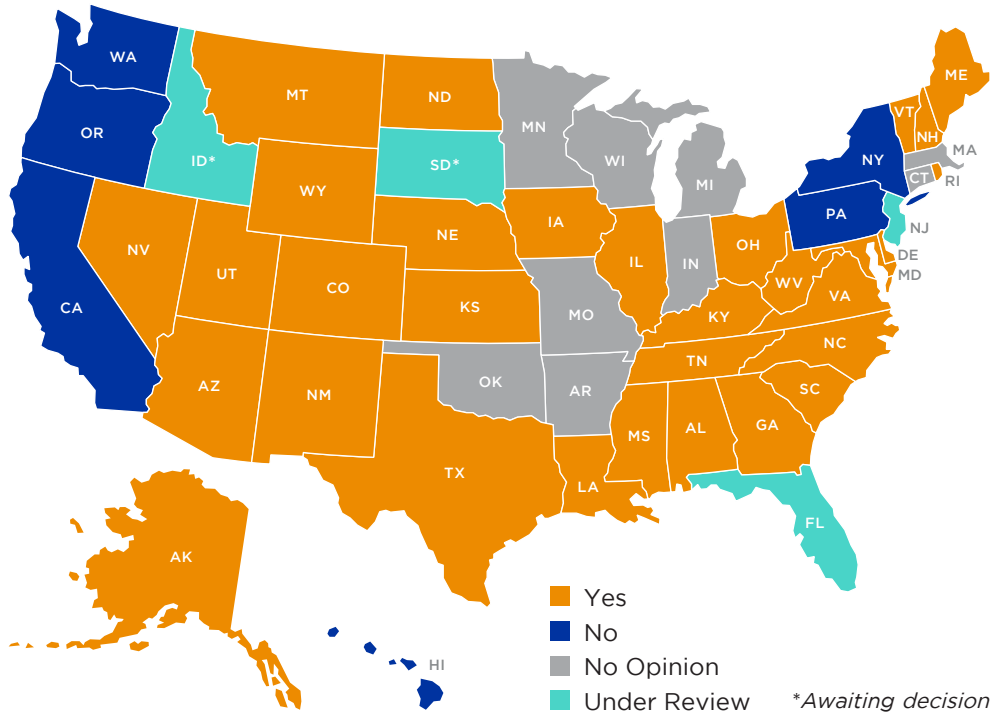

By: Stephanie Oakes

Research Question: What are muscle activation levels of the anterior and posterior fibers of gluteus minimus (G-min) and anterior, middle, and posterior fibers of gluteus medius (G-med) during isometric and dynamic exercises?

Clinical Pearl Highlights

Clinician Insight - The Home Exercise Problem A PSA from Karen Bonney, DPT

By: Karen Bonney

"Is there a standard operating definition for home exercise programs that we gain from our past education, or does this change to accommodate the patient, scenario, or goal?"

Pelvic Floor Dysfunction + Dry Needling

By: Kelly Sammis

"Every patient has a pelvis and every patient has a pelvic floor, so rather than dismiss this anatomical region, familiarize yourself with it."

Biopsychosocial Manual Therapy - The Brain has a Body

Modern pain science has questioned the use and importance of manual therapy. Is manual therapy a fad that's lost its touch? Join Dr. Adriaan Louw as he discusses the powerful interplay between neurophysiological effects, placebo, therapeutic alliance and patient expectations when it comes to treating people with spinal pain.

What's New?

Functional Dry Needling® Certification

The Functional Dry Needling Certification will develop the knowledge and clinical reasoning skills needed to assess and treat basic to complex cases. This program is designed to progress the clinician from foundational skills through more advanced strategies. Through mentored clinical practice, you will become a highly skilled clinician ready to incorporate FDN with other therapeutic techniques and exercise progression at a high clinical and diagnostic level of care.

Audience: Physical Therapists

Curriculum: 18 months online + three to five on-site labs

Tuition: \$6,625

**Application
Deadline August 1**
